## THE SCHOOL OF INFORMATION

The University of Michigan School of Information (UMSI) explores the relationship between people, information and technology. Because information is all-pervasive, UMSI's programs are broadly interdisciplinary. The faculty come from many fields, from computer science to law to social networking to public health.

UMSI educates students at the undergraduate, master's and doctoral levels to become information professionals and conduct research on the role of information technology in society. The current enrollment is 337 Bachelor of Science in Information (BSI) students, 497 Master of Science in Information (MSI) students, 91 Master of Health Informatics (MHI) students, 149 Master of Applied Data Science (MADS) students and 105 Doctor of Philosophy in Information (PhD) students.
